MULTISYSTEM *max 60V dc*

low voltage system for low voltage tracks is developed to satisfy all technical and design needs.

The **smart core** of tracks, with **installation system** for the lighting fixtures, and **integrated data bus** for light control makes it technically at the cutting edge while the various available versions of the track are in line with the market's needs.

This core provides **freedom and flexibility in design** as it is the base for developing **customized profile tracks**, maintaining compatibility with the system at the same time.

MULTISYSTEM includes **different types of adapters, end-feeds, connections and accessories** so that it is possible to create ceiling and wall applications, or a combination of both.

Materials, designs, our development program and packages may be subjected to changes without notice.

We decline all responsibility for any misprint.

All the described operations of this instructions page must be done by specialized personnel only. Exclude voltage plant. Please respect national installation regulations. The manufacturer allows to use only MULTISYSTEM parts in applications where its track system is used. These parts must be installed according to the installation instructions. The company as a manufacturer is not responsible for the safety and functioning of the MULTISYSTEM system if parts not belonging to it are used or if any deviation from the installation instructions occurs. It is then the user's responsibility to ensure the electrical, mechanical and thermal compatibility between MULTISYSTEM and the structure where it is installed and the fixtures used with it. MULTISYSTEM tracks, its components and also the adapters can't be used with accessories without the Quality Mark. On MULTISYSTEM tracks one can use only MULTISYSTEM connections. MULTISYSTEM connections can be used only with MULTISYSTEM tracks. Do not exceed listed loading indicated in the relevant section and respect fixing distances during the track mounting.

WARNING

- The use of NON SELV or U-OUT > 60V dc power supplies, drivers and components is strictly forbidden.
- A.A.G. Stucchi recommends the usage of an opto-insulated repeater Bus Data compatible (es. S-RP-24-48V).
- You can choose to use the 4 conductors of the track in 2 different modes:
 - 2 different power supplies (2 circuits, 0 - 60V dc)
 - 1 circuit for 60V dc and 1 circuit for Data Bus

If you want to create a unique Data Bus in your lighting project (building, shop, etc.), electrically connecting the low voltage track Data Bus with the Data Bus of other lighting applications, all the components involved must be SELV approved.

It is strictly forbidden to use any kind of solvent, glue, oil, grease or cleaner in contact with MULTISYSTEM components. The company is not responsible of any damage caused by the use of the materials mentioned above.

TECHNICAL INFO

- Voltage (Input): 0 - 60 V dc
- Rated Current: max. 15A
- Max functioning T: 70°C
-  Class III (SELV)
- UL approval 48V-12A
- Maximum weight of the lighting fixture: 10N with magnetic adapter; 20N with mechanical adapter
- Tracks to be used both in NON polarized and polarized versions
- Plastic components available for NON polarized and polarized versions
